

Automatic Gold/Chemical Feeders

Automatic Gold Feed

Automatic controller for the modern gold plating installation. Computes the gold necessary to replenish the bath and adds it automatically, and gives continuous readout in Amp min/hours of gold consumed per rack, per job, per hour, etc.

Automatic Chemical Feed

Automatically adds any chemicals to the bath as needed (nickel/copper brighteners, caustics etc.) by means of an amp-hour sensing unit that controls one or more metering.

Chemical Feed Controller	
3 gallon reservoir	
5 gallon reservoir	
10 gallon reservoir	
30 gallon reservoir	
Additional Feed Pumps	

To order, designate the maximum DC output on the power supply with which the gold/chemical feeder is to be used, and then list the desired reservoir size.

Prices subject to change without notice.
