

Bench-top Brush Plating Systems

Technic Bench-top Plating System

Technic's Bench-top Brush Plating System is perfect for laboratory use, workshops, on-site repairs and for creating special effects.

Our bench-top system features a 10 amp, 12 volt, 5% ripple rectifier with manual powerstat controls. The unit comes complete with a stainless steel plating wand and all the necessary connecting leads as well as a dozen cotton plating sleeves.

Technic also offers a complete line of brush plating solutions. For more information on this product contact our sales department.
