

FOR IMMEDIATE RELEASE

Join us at the New York State Innovation Summit

Showcasing Cutting-Edge Technologies on October 16-17, 2023

Saratoga Springs, NY – The countdown begins for a groundbreaking event! The New York State Innovation Summit returns on October 16-17, 2023, at the prestigious Saratoga City Center. This event unites forward-thinking organizations from across the state, offering an exceptional opportunity to delve into the latest technologies driving innovation and business growth.

Technic's Advanced Technology Division, headquartered in Long Island, NY, is excited to announce its participation this year. Technic stands as a pioneering provider of cutting-edge solutions for semiconductor fabrication and packaging, boasting a comprehensive range of products. These include electroplating chemistry, photoresist strippers, cleaners (post-etch residue removers), metal etchants, high-purity wet chemistry, and state-of-the-art semiconductor manufacturing equipment.

The 2023 New York State Innovation Summit is primed to shine a spotlight on companies and researchers pushing the boundaries of emerging technologies while advancing production capabilities. This event pays homage to New York State's trailblazing role in technology-led economic growth. It will feature experts in biotechnology, new materials, energy innovation, and artificial intelligence who will explore current technology convergence opportunities, strategies for accelerating commercialization, and the critical issue of manufacturing sustainability.

This summit serves as an invaluable opportunity to foster collaboration, bridging industry leaders with experts capable of facilitating growth. It bolsters our statewide innovation ecosystem and spotlights promising early-stage companies. Whether you are a startup aiming to break into the tech scene, an economic developer in pursuit of opportunities, or an established manufacturer striving to maintain a competitive edge, the NYS Innovation Summit is your gateway to innovation.

About Technic's Advanced Technology Division: Technic's Advanced Technology Division is a leading provider of cutting-edge solutions encompassing semiconductor fabrication and packaging, connector technologies as well as a range of industrial applications, and analytical controls. Committed to innovation and excellence, Technic supplies a comprehensive range of chemistries and equipment, supporting the full scope of metal finishing technologies.

About Technic: Technic is a globally recognized leader in advanced metal finishing technologies, offering proprietary process chemistry, equipment, and controls. With a commitment to innovation and customer satisfaction, Technic serves a diverse range of industries, including industrial, electronic, and decorative finishing.
