Technic to Feature Industry Expertise and Advanced Chemistries at IPC APEX EXPO 2026

Anaheim, CA—Technic will participate in **IPC APEX EXPO 2026**, taking place **March 17–19** at the Anaheim Convention Center in Anaheim, California. Recognized as one of North America's most influential electronics manufacturing events, IPC APEX EXPO convenes industry leaders, engineers, and innovators for technical education, professional networking, and a comprehensive exhibition showcasing the latest advancements in PCB fabrication and assembly.

At **Booth #4720**, Technic will spotlight its process expertise and advanced materials technologies while offering attendees direct access to one of the industry's most respected technical authorities, Mike Carano.

Carano, a distinguished leader in electronics manufacturing and process chemistry, has been an active IPC contributor for decades. He has served on 16 IPC committees and is a recipient of the IPC Hall of Fame Award. With more than 150 published technical articles and global speaking engagements, Carano has significantly influenced the advancement of metallization processes, surface finishing, and materials innovation across the PCB industry.

“We are excited to welcome Mike Carano to our booth at IPC APEX EXPO 2026. His depth of knowledge and longstanding contributions to IPC make him an exceptional resource for engineers and manufacturers seeking practical solutions and forward-thinking insights.”

— Denis Jacques, Global Product Manager, PWB

As part of the event's technical conference program, Denis Jacques will present a paper titled **“Advancements in Solderable Finishes for 5G Applications,”** highlighting the evolving performance requirements of next-generation electronics and the latest developments in surface finishing technologies designed to meet the reliability and signal integrity demands of 5G infrastructure and devices.

Visitors will also have the opportunity to meet with Technic's technical specialists to explore **ISIG** and **Circudep Black Knight** technologies and how these solutions are helping manufacturers address evolving reliability as well as production challenges. Technic invites attendees to stop by Booth #4720 to connect with its experts and discover how its advanced chemistries continue to drive innovation in electronics manufacturing.

For information on Technic & Technic products go to: www.technic.com or contact Technic at (401) 781-6100.

About Technic: For over 80 years, Technic has been a global supplier of specialty chemicals, custom finishing equipment, engineered powders, and analytical control systems to the semiconductor, electronic component, printed circuit board, industrial finishing, and decorative industries. Technic is also a major supplier of engineered metal powders to the solar industry.
