Techni Print Eco-Reclaim Agent makes support cleaner disposal easy, safe and clean

Simple Additive Eliminates the Need for Waste Treatment

Cranston, RI USA – Technic has announced the release of Techni Print Eco-Reclaim Agent, a powdered additive to process saturated Techni Print Cleaning Solution for easy and safe disposal.

Techni Print's Eco Reclaim Agent has the unique ability to reclaim almost all of the support material from a saturated Techni Print solution. With this unique additive, a fully saturated Techni Print cleaner can be separated into a solid mass of support material and a clarified liquid with a pH of less than 9.

This easy to implement treatment step ensures significantly less waste by volume, making disposal of reclaimed FDM support materials possible from a clarified solution that meets most regulatory statutes for disposal down the drain.*

Packaged in 10 Gallon treatment units, the *Techni Print Eco-Reclaim Agent* is available for online purchase at www.techniprint-technic.com or through an authorized Techni Print distributor.

**Please check your local environmental discharge regulations.*
