Technic Marks 80 Years of Industry Leadership

Cranston, Rhode Island, USA — Technic is proud to celebrate 80 years as a trusted leader in specialty chemicals, surface finishing equipment, analytical controls, and engineered powders, serving numerous end use markets around the globe.

Founded in Providence, Rhode Island in December 1944, Technic began operations as a chemical supplier to the New England decorative industry. By the late 1940s, Technic's expertise and products were used to support the earliest stages of the electronics industry. In the 1950s, Technic would become an essential resource, developing specialty products and equipment for the rapidly growing electronics industry.

In the 1960s and 1970s, Technic expanded operations throughout the US, setting up service and distribution centers in California, Illinois, and Texas. By the 1990s, Technic had grown to serve global markets with operations throughout North America, Europe, and Asia.

Today, Technic operates 27 facilities in 14 countries with over 1,100 employees worldwide. We have created an [interactive timeline](#) highlighting our development over the past 80 years into a global corporation, supporting and pioneering products for today's leading technologies. These achievements would not be possible without the countless number of talented and dedicated people who have been part of our Technic family over the past almost eight decades. In honor of all those who have helped build our company and to our current employees worldwide, we say THANK YOU!

To our loyal customers, we offer our most sincere appreciation for allowing us the opportunity to serve you, and we look forward to continuing to build our relationships for years to come.

About Technic

Technic Inc. is a Rhode Island based corporation with over 1,100 employees worldwide. For 80 years, Technic has been a global supplier of specialty chemicals, custom finishing equipment, engineered powders, and analytical control systems to the semiconductor, electronic component, printed circuit board, industrial finishing, and decorative industries.
