Technic to Showcase Sustainable Semiconductor Solutions at SEMICON Southeast Asia 2025

Cranston, RI - Technic is pleased to announce its participation in SEMICON Southeast Asia 2025, taking place May 20–22 in Kuala Lumpur. As the region's premier event for the semiconductor industry, SEMICON SEA brings together industry leaders from across the global supply chain to explore the future of technology, sustainability, and manufacturing. This year's focus on reducing environmental impact aligns directly with Technic's long-standing commitment to sustainable process solutions for advanced semiconductor applications.

At the event, Technic will feature its Elevate® line of high-performance electrodeposition chemistries, developed to meet the growing demands of advanced packaging with precision, reliability, and environmental responsibility. From cyanide-, thallium-, and arsenic-free gold chemistries to robust, high-reliability formulations for wire bonding and eutectic applications, Technic's Elevate® products deliver consistent results while supporting long-term process efficiency and regulatory compliance.

Technic will also spotlight its comprehensive TechniStrip® product line, engineered to deliver superior performance, process control, and sustainability. This line includes high-performance liquid resist and laminated film strippers, precision etchants under the TechniEtch brand, and effective post-etch residue removers and PCMP cleaners through TechniClean. These solutions are designed to support yield, reduce variability, and meet the most demanding environmental standards across advanced node technologies.

With a legacy in precious metal chemistry dating back to the 1940s, Technic continues to drive innovation and performance in semiconductor manufacturing. Our chemistry solutions are trusted worldwide to help streamline production processes from start to finish.

Visit Booth #L3145 to meet with Technic's team of experts and discover how our products can support your goals in innovation, efficiency, and sustainability. We look forward to connecting with you at SEMICON SEA. Visit Technic at SEMICON Southeast Asia 2025 to learn how our products can support your goals in innovation, efficiency, and sustainability. We look forward to connecting with you at the event.
