

Technic Anodizing Equipment

- Type I Chromic
- Type II Sulfuric
- Type III Hardcoat

Turnkey Systems

- Equipment Design & Manufacturing
- Project Management
- Field Installation
- Start-up & Commissioning

Technic is an industry leader in the design and manufacturing of a full line of equipment and chemistry for the metal finishing industry.

With over 50 years experience, Technic has the in-house engineering, construction and technical expertise to supply the ideal solution for your anodizing needs.

When you select Technic, you're assured of receiving a quality engineering, construction, and service that will exceed your expectations.

Hoists: Overhead, Sidearm, Rim Runner, Monorail

Hoist capacities ranging up to 4,000 lbs. We offer standard and customized systems that are both reliable and affordable, meeting not only your production goals, but your budget as well.

Controls

Technic hoist controls are available from simple manual joystick operation to complete operator touch screen workstations.

- PC Based
- Programmable Logic Controller (PLC) Based
- Fixed Timeway & Random Loading Software

Integral Exhaust/Ventilation Systems

All Technic ventilation hoods and ductwork are designed to meet or exceed the latest ACGIH standards.

Fume scrubbers, exhaust fans and recirculation systems can be added to provide a complete system package. Full system enclosures and hoist ventilation options are also available.

Waste Treatment Equipment

Continuous Flow and Batch Treatment systems can be incorporated into Technic systems through our strategic alliance and partnership with DMP Corporation, an industry leader in waste treatment

Tanks

Built to customer specifications, our quality constructed Polypropylene, PVC, Mild and Stainless Steel tanks offer years of reliable service.

Rectifiers

SCR/Thyristor type with Ramp Control

Local, remote or computer controlled models available in either air or water cooled designs.

Chillers

Complete chiller systems selected to suit each application including pumps, reservoir tanks and heat exchangers.

Retrofits/Upgrades

Technic provides complete field services including support for existing Baker and Plasfab systems.
